

SAND STORAGE BY THE INDUSTRY LEADER TANK CONNECTION AFFILIATE GROUP!

Tank Connection is the only tank supplier worldwide that designs, manufactures and installs all four types of steel storage tanks including bolted RTP, field-weld, shop-weld and hybrid tank designs for all types of sand storage applications.

Our precision RTP (rolled, tapered panel) construction is the #1 bolted tank design for sand and aggregate storage. The best features of bolted and field-weld tank construction have been combined together in the RTP design. It remains unmatched in the industry in all category ratings.

In sand and aggregate storage, Tank Connection builds the premier storage and load out facilities in North America. In storage tank designs we offer:

- ✓ Bolted RTP hopper tanks in sizes up to 48' diameter with capacities up to 7000 tons of product storage.
- ✓ Field-Weld hopper tanks in sizes up to 60' diameter with capacities up to 10,000 tons of product storage.
- ✓ Shop-Weld hopper tanks up to 15' diameter with capacities up to 500 tons of product storage.

Integrated aggregate storage systems are designed to interface with a preferred equipment package. Mechanical fill and gravity or mechanical discharge for truck and rail loading are typical applications.

Adjacent picture depicts integrated sand storage and truck load out terminal.

We build premier turnkey frac sand storage terminals from the ground up!

TCAG Services

In sand and aggregate storage, Tank Connection specializes in XL storage tanks, custom engineered truck and rail drive-through designs and integrated storage systems. We provide:

- ✓ Phone & email consultation
- ✓ Specification development
- ✓ Design & engineering services
- ✓ Storage system integration
- ✓ Storage tank manufacturing
- ✓ Auxiliary equipment interface & procurement
- ✓ Project management services
- ✓ Field construction services
- ✓ Start-up & field training
- ✓ “Golden Rule” customer service

RTP Bolted Tank Construction

Tank Connection provides complete turnkey field installation service, utilizing a synchronized, hydraulic screw jack process, which allows field crews to install large XL tanks at grade level. TCAG field installation services are rated the best in the industry for safety and installed field quality.

Tank Connection Coatings are Unmatched!

Tank Connection's EXT Fusion 5000 FBE™ is unmatched in performance compared to ALL exterior coating systems offered in the industry today for bolted tank construction. Additionally, at TCAG our coatings are applied utilizing the latest, state-of-the-art coatings technology. Compared to other products, the coating mil thickness on RTP tank construction by TC is typically 50% greater. We offer no short cuts in providing the best coatings systems designed for abrasion resistance, corrosion resistance, flexibility, chip resistance, weatherability and UV protection.

The BEST Exterior Coating System – EXT Fusion 5000 FBE™ + EXT Fusion SDP™

FBE – fusion bond epoxy powder
SDP - super durable polyester hybrid powder

The advanced chemistry of this system has proven to be the best bolted steel tank exterior coating system available worldwide providing extended service life in the field.

On your next sand storage project, “*GET CONNECTED*” with the industry leader and unmatched performance of the Tank Connection Affiliate Group! For more information about TCAG, please visit our website at www.tankconnection.com.
